

## **Legacy Match Profile Verification Controls**

**Effective Date:** June 23, 2026

This document describes the controls Legacy Match uses to verify user profiles during registration and reduce fraudulent, abusive, or deceptive account creation.

---

### **1. Account Registration Requirements**

All users must complete a standardized registration process that includes:

- Valid email address submission
- Email verification prior to full account activation
- Agreement to Terms of Service and Acceptable Use Policy
- Age affirmation confirming the user is 18 years or older

Accounts that do not complete verification steps are restricted from accessing full platform functionality.

---

### **2. Email Verification**

Legacy Match requires users to verify their email address as a primary authentication step. This helps:

- Confirm account ownership
- Reduce automated or bot-generated registrations
- Prevent the use of invalid or disposable emails where possible

Unverified accounts are limited or prevented from participating in core platform features.

---

### **3. Profile Information Validation**

During registration, users are required to provide basic profile information intended to support authenticity and user trust, which may include:

- Display name
- Profile photo upload

- Personal preferences relevant to matchmaking

Legacy Match applies automated checks to detect incomplete, suspicious, or inconsistent profile data.

---

#### **4. Automated Fraud and Abuse Detection**

Legacy Match uses automated systems to identify potentially fraudulent or abusive registrations by analyzing:

- Rapid or repeated sign-up attempts
- Suspicious IP or device activity patterns
- Use of duplicate or previously flagged profile images (where applicable)
- Indicators of bot or automated account creation

Accounts flagged by these systems may be restricted pending further review.

---

#### **5. Manual Review and Enforcement**

Accounts flagged for potential verification issues may be reviewed by authorized personnel. Based on review outcomes, Legacy Match may:

- Request additional verification or clarification
  - Restrict or suspend account access
  - Permanently remove accounts determined to be fake, deceptive, or abusive
- 

#### **6. User Reporting**

Users may report suspected fake or fraudulent profiles at any time through in-app reporting tools. These reports are reviewed and prioritized based on severity and potential risk to platform integrity and user safety.

---

#### **7. Ongoing Monitoring and Improvements**

Legacy Match continuously evaluates and improves its verification and fraud prevention systems to address emerging risks, enhance accuracy, and maintain platform trust and safety.

---

**Contact:**

Verification and safety concerns may be submitted through Legacy Match's official support channels or in-app reporting tools.
