

## **Legacy Match Safety, Detection, and Prevention Protocols for Prohibited Conduct**

**Effective Date:** June 23, 2026

This document outlines Legacy Match’s protocols for identifying, preventing, and responding to prohibited activities on the platform, including human or sex trafficking, illegal acts, impersonation, and child sexual abuse material (CSAM). These protocols are designed to ensure user safety, legal compliance, and platform integrity.

---

### **1. Human or Sex Trafficking Prevention Protocols**

Legacy Match maintains a zero-tolerance policy toward human trafficking, sex trafficking, exploitation, or any related facilitation. The platform is designed for consensual adult social connection only.

To prevent trafficking-related activity, Legacy Match implements:

- Mandatory age restriction requiring all users to confirm they are 18 years or older during registration
- Automated monitoring systems designed to detect suspicious language patterns, coercion indicators, and exploitation-related content in profiles and communications (where messaging is enabled)
- Behavioral analysis tools that flag unusual account activity, including mass messaging, coercive outreach, or coordinated suspicious behavior
- User reporting mechanisms allowing immediate reporting of suspected exploitation or trafficking activity

Any accounts or content suspected of involvement in trafficking are immediately restricted pending review. Where credible indicators exist, accounts may be permanently terminated, and relevant information may be preserved and escalated to appropriate law enforcement authorities as required by law.

---

## **2. Illegal Acts Prevention Protocols**

Legacy Match actively works to prevent the use of its platform for illegal activities, including fraud, harassment, threats, exploitation, and other unlawful conduct.

Protocols include:

- Email verification and account validation at onboarding to reduce fraudulent or deceptive accounts
- Automated screening of user-generated content for indicators of scams, fraud, threats, harassment, or other unlawful behavior
- Detection of abnormal usage patterns such as spam activity, automated messaging, or coordinated abuse
- User reporting tools to flag suspected illegal activity directly within the platform
- Manual review by authorized personnel of flagged accounts and reported incidents

When illegal activity is suspected or confirmed, Legacy Match may take enforcement actions including content removal, account suspension or termination, preservation of relevant records, and referral to law enforcement when required by applicable law.

---

## **3. Impersonation Prevention Protocols**

Legacy Match prohibits impersonation of any individual or entity, including false identity representation or misuse of another person's likeness.

To prevent impersonation, Legacy Match implements:

- Requirement for users to provide accurate personal information during account creation
- Email verification to reduce fake or duplicate account creation
- Automated detection of duplicate images, reused profile content, and inconsistent profile data
- Behavioral monitoring to identify suspicious or deceptive account activity
- User reporting tools to flag suspected fake or impersonating profiles
- Manual review of accounts flagged for identity concerns

Impersonating accounts are subject to immediate enforcement action, including removal, suspension, or permanent termination. In cases involving fraud or identity theft concerns, Legacy Match may preserve data and escalate to appropriate authorities.

---

#### **4. Child Sexual Abuse Material (CSAM) Prevention Protocols**

Legacy Match maintains a strict zero-tolerance policy toward CSAM. The platform is strictly limited to users 18 years of age or older, and underage users are not permitted.

To prevent and detect CSAM, Legacy Match implements:

- Mandatory age affirmation at registration (18+ requirement)
- Automated screening systems designed to detect and flag known or suspected illegal imagery and content
- Immediate removal and escalation of any content flagged as potentially illegal for urgent human review
- Monitoring of user-generated content, including profile images, text, and communications (where applicable), for indicators of exploitation or underage involvement
- Priority user reporting channels for suspected CSAM or underage activity, reviewed immediately upon receipt

If CSAM is identified or reasonably suspected, Legacy Match takes immediate action including permanent account termination, preservation of relevant data, and reporting to appropriate law enforcement and child protection authorities as required by law.

Associated accounts and identifiers may also be restricted to prevent further harm.

---

#### **Ongoing Review and Compliance**

Legacy Match continuously evaluates and improves its safety systems, detection technologies, and enforcement procedures to address evolving risks and maintain compliance with applicable laws, regulations, and payment processor requirements. While robust safeguards are in place, no system can guarantee the prevention or detection of all prohibited activity, and Legacy Match relies on a layered approach combining automation, human review, and user reporting.

---

**Contact:**

For safety-related concerns or reports of prohibited activity, users should use the in-platform reporting tools or contact Legacy Match through its official support channels.
